2. Introduction

The Afghanistan drug price-monitoring report is implemented by the Narcotics Survey & Analysis Directorate. The monitoring of drug prices is carried out in selected provinces of Afghanistan since 1994 (18 provinces as of September 2011). The results provide a detailed picture of the prices of opiates on a monthly basis. The price of the opiates contributes towards understanding the opiate economy in Afghanistan and published in the Afghanistan opium survey reports annually.

The price monitoring includes major licit crops, precursor-chemicals, illicit crops and syntactic drugs which are included in the report since October 2019. On the last page, the methodology section explained the method, that we prepared this report.

3. Opium

3.1 Dry opium

5. Synthetic Drugs

Synthetic drugs are a dangerous chemical and it has intensive effects on health, and after a long time it makes consumer addicted, and can be potentially life threatening. Primary users, of these synthetic drugs are youths in Afghanistan; because products are cheap and easily accessible to teenagers everywhere, at stores, smoke shops and party ceremonies.

Synthetic drugs, could be addictive and creates a serious threat on the health of every one in daily life. Methamphetamine², Tablet K and Sosegon are available in Afghanistan, which Methamphetamine is

6. Cannabis Resin

There are mainly three types of cannabis resin available in Afghanistan namely Garda # 1, # 2 and # 3 with quality as best, moderate and fair respectively. Garda # 1 (Shirak) in Badakhshan province was the most expensive cannabis resin because of its pure quality. Earlier Garda # 1 (Jooshi) of Balkh province was most expensive and popular because of its high quality however it lost its demand due to blending with lower quality hashish.

³ Acetic anhydride is the chemical compound with the formula $(\text{CH}_3\text{CO})_2\text{O}$. Commonly abbreviated Ac_2O , it is the simplest isolable anhydride of a carboxylic acid and is widely used as a reagent in organic synthesis. It is a colourless liquid that smells strongly of acetic acid, which is formed by its reaction with moisture in the air.

11. Methodology

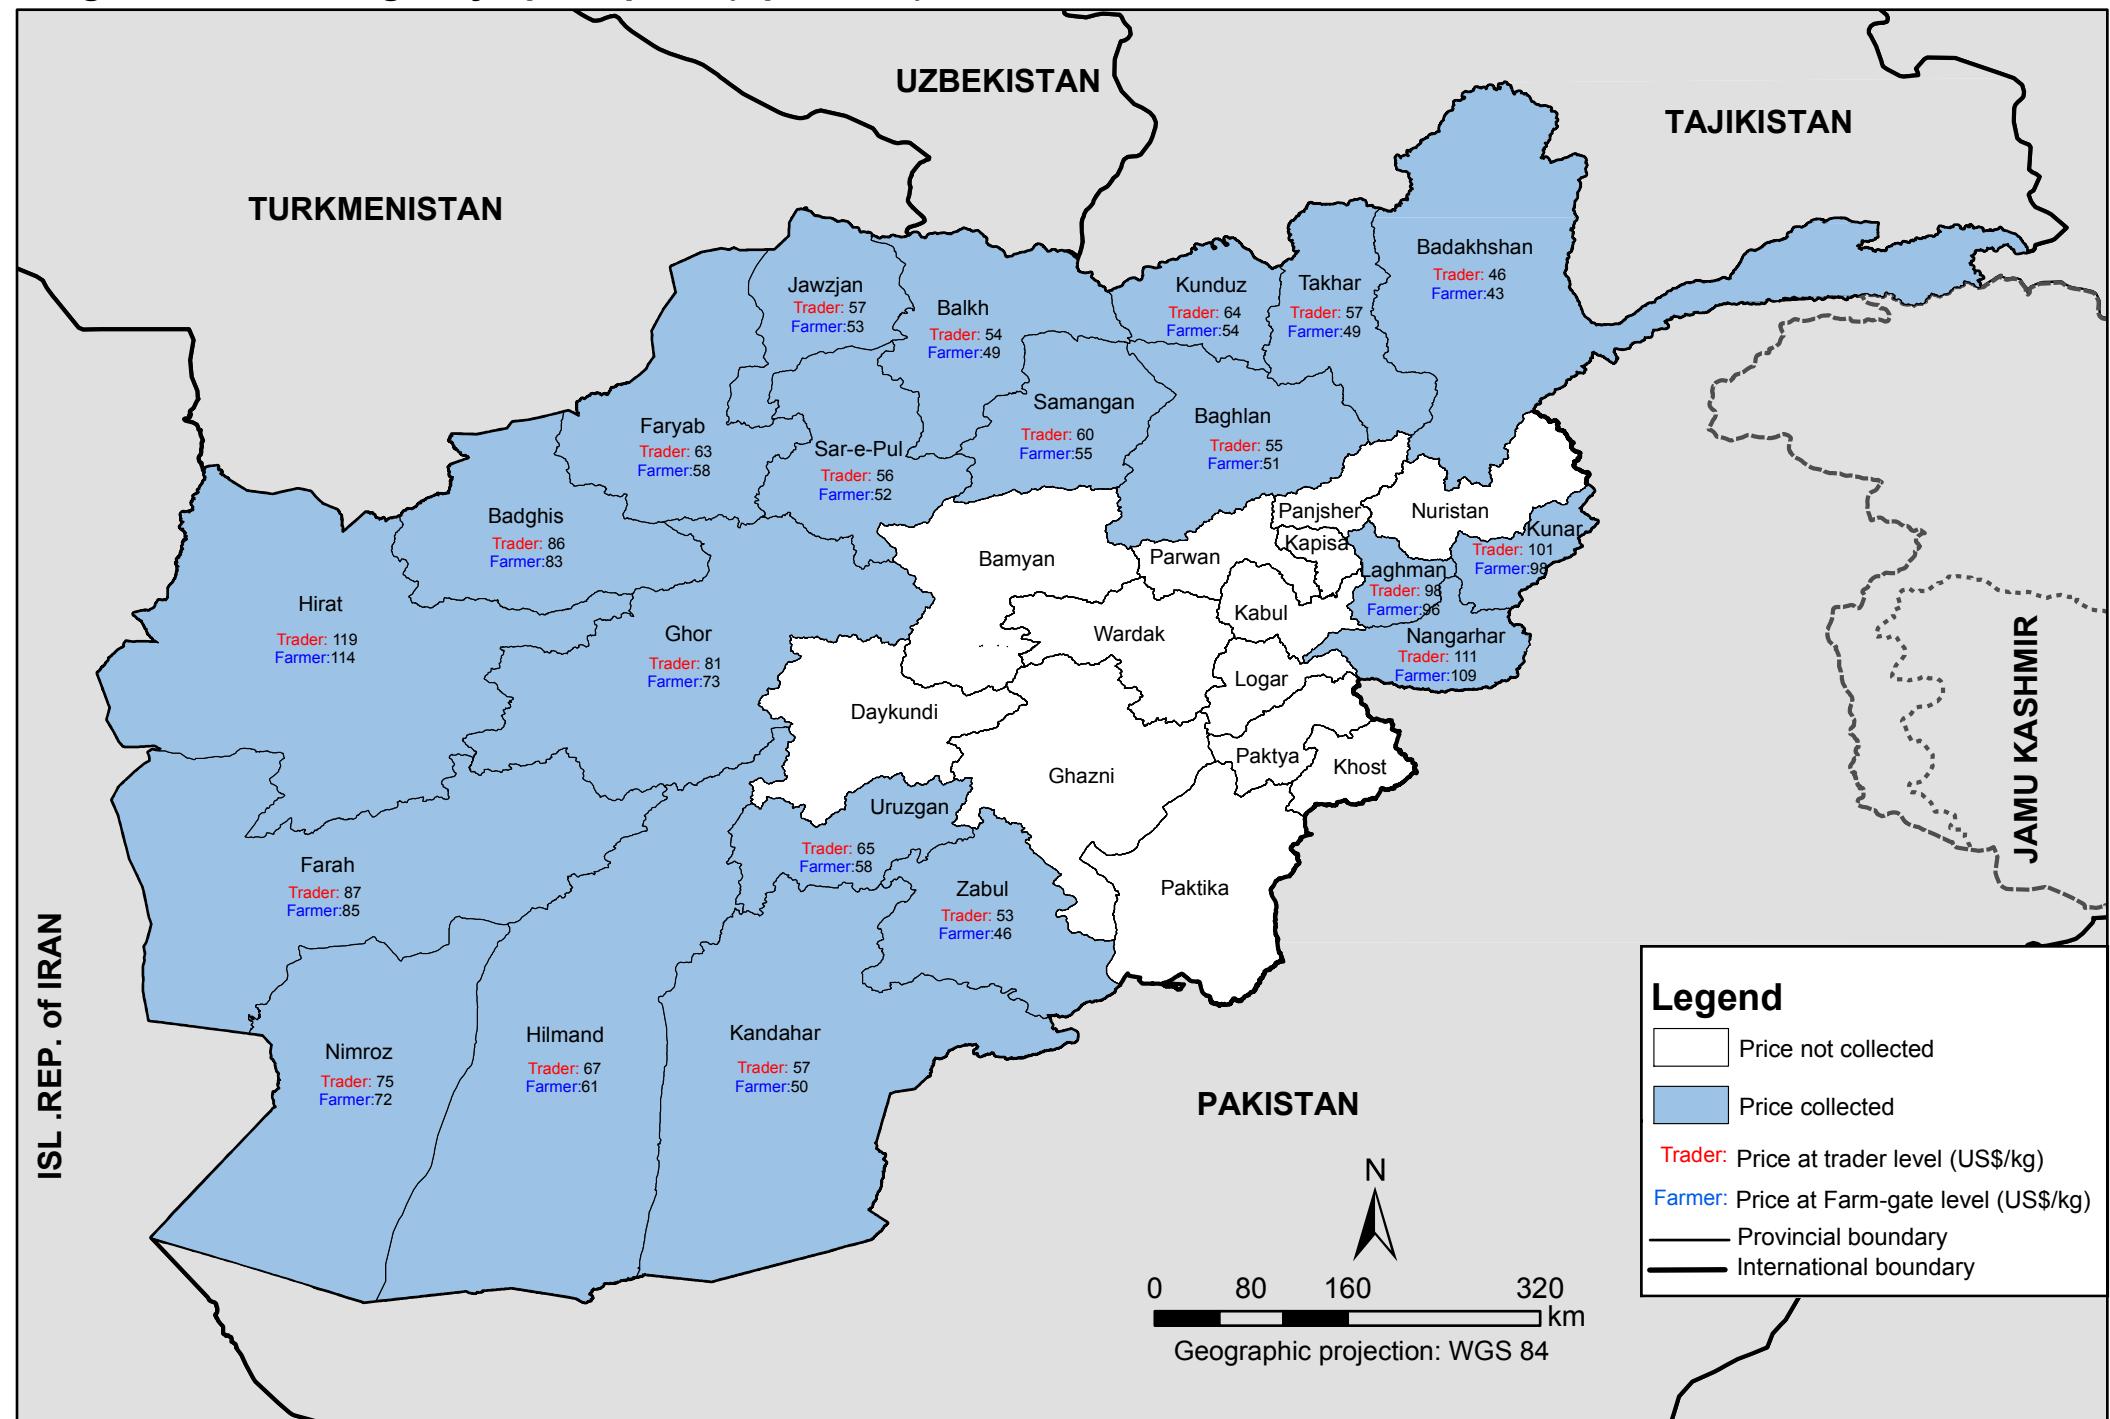

- ❖ Prices are collected in the last week of every month from around twenty farmers and equal numbers of traders by NSAD Survey coordinators generally from different farmers and traders each month. The price data collection is sourced from a few known farmers and traders as well.
- ❖ Opium prices are collected from 21 out of 34 provinces namely Badakhshan, Baghlan, Badghis, Balkh, Farah, Faryab, Ghor, Hilmand, Hirat, Kandahar, Kunar, Kunduz, Laghman, Nangarhar, Nimroz, Uruzgan, Takhar, Sur-Pul, Samangan, Jawzjan and Zabul. The prices of dry and fresh opium are collected from farmers (at farm-gate level) and traders (at trader level).
- ❖ Different varieties of heroin, morphine⁴ and cannabis resin prices are collected from six provinces of Afghanistan namely Badakhshan, Balkh, Hirat, Nangarhar, Kandahar and Takhar.
- ❖ Prices of some licit crops such as wheat, saffron, imported and local rice is also collected from six provinces of Afghanistan and included in this report.
- ❖ Prices of poppy seeds, cannabis seeds and acetic anhydride are included in the report as well.
- ❖ The prices are also presented in local currency for convenience of certain analysis; however, the national average prices are presented in USD. At the regional level, average prices are reflected in local currency with exception of the Western region since prices are reported in two different currencies.
- ❖ Prices are reported in different currencies in different regions. The prices in Eastern region (Kunar, Laghman and Nangarhar) and Southern region (Kandahar, Hilmand, Uruzgan and Zabul) are reported in Pakistani rupees. In Northern (Balkh, Baghlan, Farayb, Sur-Pul, Samangan and Jawzjan) and North-eastern (Badakhshan, Kunduz and Takhar) regions, the prices are reported in Afghani. However, prices are reported in two different currencies namely Afghani and Iranian Tuman in Western (Hirat, Nimroz, Farah, Badghis and Ghor) region. The prices are converted in US\$ using the exchange rate from (oanda.com) site considering the rates on the same date the observation is made.

Fresh Opium	109	109	15

⁴ This medication is used to help relieve moderate to severe pain. Morphine belongs to a class of drugs known as opioid (narcotic) analgesics. It works in the brain to change how your body feels and responds to pain.
